¹ Murine adapted (MA30), synthetic MERS clone from 2017

² Human betacoronavirus 2c EMC/2012 (first MERS isolate)

³ Genotype B (not pat7-negative first 2005 isolate N1 with genotype A)

⁴ Closest evolutionary betacoronavirus relative of SARS-CoV-2 genomic sequence (as of 2024); identical data for bat betacoronavirus BANAL-20-52

FCS: Furin Cleavage Site

NLS: Nuclear Localization Signal
